ACADEMIC PROJECTS

Mrs. Brave Cake Shop – is a full-featured e-commerce web application designed to streamline the cake ordering process for both customers and shop administrators.

Enrollment System - is a web-based application built to streamline the student enrollment process for educational institutions.

Network Design – Created a basic network topology using Cisco Packet Tracer and configured basic IP addressing.

OBJECTIVES:

A motivated and detail-oriented BS Information Technology student seeking an On-the-Job Training (OJT) opportunity to apply academic knowledge in a real-world setting. Eager to develop both technical and professional competencies, gain hands-on industry experience, and deliver meaningful contributions to the organization while building a solid foundation for a future career in IT.

IT SKILLS:

Technical: HTML/CSS, basic JavaScript, basic PHP, basic Python, MySQL, basic networking, troubleshooting, as well as data entry and data management.

Tools: Microsoft Word, Excel, PowerPoint, Google Workspace, Canva, Visual Studio Code, GitHub, and have basic working knowledge of Figma.

Professional: Effective communication, teamwork, problem-solving, time management, adaptability, and a willingness to learn.

WORK EXPERIENCE:

Lead Verification Specialist

Huervana St., La Paz, Iloilo | 2024 – 2026

- Verified and validated customer information to ensure accuracy and compliance with company standards.
- Conducted outbound calls and cold calling to verify lead information, qualify prospects, and gather relevant details.
- Handled large volumes of data with high attention to detail, minimizing errors and inconsistencies.
- Assisted in maintaining updated records and ensuring information integrity for smooth operations.
- Contributed to meeting performance targets by maintaining accuracy and efficiency in daily tasks.
